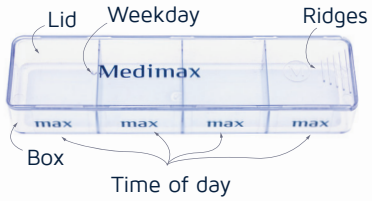
KIBODAN

Pill box diagram



Before use!

- We recommend washing each pill box before using your Medimax for the first time. You can wash them by hand with a mild detergent or in a dishwasher at 50 °C.
- We also recommend cleaning before refilling your pill boxes, especially if your medication changes
- Remember to keep your pill boxes out of reach of from children.
- Pay close attention to the storage requirements of your medication; some medication cannot be removed from its original packaging before use. There may be temperature or photo-sensitivity or other requirements. If in doubt please ask your doctor or pharmacist

1

- Remove the pill boxes from the cover
- Slide the lid/lids back and remove completely

2

- Place your medication in the appropriate compartments/boxes

3

- Replace the lid. The lid is secure when you feel/hear a click

4

- Slide back the lid to uncover the appropriate compartment
- Simply tip the medication into you hand

5

- Slide the lid to the closed position

Tip! You can record information about your medication on the medicine card provided

6

Tip! Extra dividers are available for purchase if needed
